PROFESSIONAL SUMMARY

Unity C# Game Developer and 3rd-year BSEMC student specializing in game mechanics, puzzle design, and interactive experiences. Published multiple games on itch.io with strong expertise in Unity 2D/3D development. Proven track record of leading teams and delivering polished, creative projects. Seeking game developer opportunities to create engaging player experiences.

TECHNICAL SKILLS

Game Development:

Unity (2D & 3D), Unity C#, Game Mechanics Design, Puzzle Systems

Programming Languages:

C#, Python, Java

Game Design:

Level Design, UI/UX for Games, Player Experience, Game Balancing

Tools & Technologies:

Git, GitHub, Trello, itch.io, Visual Studio, Affinity

Web Development:

React, Flask (secondary skills)

Databases:

SQL

Other:

Backend Development, REST API, Server-side Functionality

NOTABLE PROJECTS

1. Loophole: The Prison Break - Time-loop Cloning Puzzle Game

A 3D puzzle platformer where you play as Hyde, a prisoner who can clone himself. Solve environmental puzzles by looping time and coordinating with past selves.

Technologies Used: Unity (3D), C#, Affinity (Graphics)

Steam: store.steampowered.com/app/4323880/Loophole_The_Prison_Break

GitHub: <https://github.com/kairosolo/GMTK-2025>

2. Piece by Piece - Vicente Manansala Inspired Puzzle Game

A relaxing puzzle game inspired by Filipino artist Vicente Manansala. Learn art principles through interactive puzzles and reveal a masterpiece as you progress.

Technologies Used: Unity (2D), C#

itch.io: kairosolo.itch.io/piece-by-piece

GitHub: github.com/kairosolo/piece-by-piece

3. Chop Chop TD - Endless Culinary Tower Defense

An endless tower defense game where you manage a restaurant, place cooking stations, and serve customers to survive as many days as possible.

Technologies Used: Unity (2D), C#

itch.io: studiosbakunawa.itch.io/chop-chop-td

GitHub: <https://github.com/kairosolo/foodrushtd>

4. Wishes Come True - Match Magical Items to Grant Wishes

A game where you run a magical shop, listening to customers' wishes and choosing the right magical item to help them. Quick reactions and combo systems keep the gameplay engaging.

Technologies Used: Unity (2D), C#

itch.io: kairosolo.itch.io/wishes-come-true

GitHub: github.com/kairosolo/wishes-come-true

5. HusAI - Full-Stack Web Application

FullStack Developer (2024–2025)

A full-stack AI-powered learning platform that transforms study materials into interactive quizzes, flashcards, and timed practice sessions for students and professionals.

Technologies Used: React, Flask (Python), REST API, SQL (PostgreSQL)

Website: husai.net

GitHub: github.com/kairosolo/husai

EDUCATION

Bachelor of Science in Entertainment and Multimedia Computing (BSEMC)

C/I/T | Currently 3rd Year

CERTIFICATIONS

- **Certificate of Completion** – APEC Schools (2020)
- **Certificate of Completion** – AMA (2022)

SOFT SKILLS

- **Leadership:** Led multiple school game development teams with coordinated execution
- **Communication:** Comfortable speaking publicly, facilitating discussions, and aligning team members
- **Problem Solving & Creativity:** Strong ability to analyze game design issues, propose solutions, and adapt creatively
- **Project Management:** Uses Trello for scheduling, task creation, and workflow organization
